

eRegioTruck

Electric drive solution
for commercial vehicles

BOSCH
Invented for life

Powertrain systems and electrified mobility

From 7.5t up to 26t for regional goods distribution and inner-city goods delivery

economical and efficient

contributes positively to the total cost of
ownership (TCO)

local emission-free

Electric drive fullfills upcoming city
regulations and reduces the CO₂ footprint.

- ▶ With the eRegioTruck concept the regional distribution traffic in a range of 250 km per day becomes electrified economically and cost efficiently.
- ▶ The quiet-operation and local emission-free electric drive contributes to equalize traffic temporally by enhancing delivery times and enables entry to restricted inner-city areas.
- ▶ Bosch offers one electric drive solution for various installation options resulting in reduced development costs and time.
- ▶ This includes solutions for medium-duty and heavy-duty trucks, coaches, city busses and even special use case.
